

WE CARE SOLAR

Key Impact Data

- 6,365 Solar Suitcases deployed
- 7.5 million mothers and infants served
- 26,062 health workers trained
- 59,000 tons of CO₂ averted
- 76 partnerships established

2021 Programs

- Sierra Leone
- Uganda
- Ethiopia
- Zimbabwe
- Mozambique
- Madagascar

Selected Awards

2021

Kirby Impact Prize, Finalist

2020

*Alliance for Rural Electrification
Rodenberry Award Finalist
Million Lives Club*

2019

*Zayed Sustainability Prize
Time Magazine Best Inventions
Edison Gold Award for Innovation
Ashden Award Finalist*

2017

*UNFCCC Climate Change Award
Drucker Innovation Prize
Bloomberg New Energy Pioneer*

2016

*National Energy Globe Award,
Ethiopia*

2015

*UN DESA Powering the Future
Award
UBS Optimus Award*

2013

*Katerva Gender Equality Award
CNN Top 10 Hero, Dr. Laura Stachel*

WE CARE SOLAR

The Power to Save Lives

The Problem

Each year, almost 300,000 women and one million newborns die from pregnancy and childbirth complications. Most of these deaths occur in Africa and Asia. COVID-19 has exacerbated these problems.

Obstetric emergencies require prompt, appropriate, reliable care. Unreliable power and communication in health facilities result in:

- Life-threatening delays in care
- Inadequate lighting for obstetric and surgical procedures
- Underutilization of health facilities

The Solution

We Care Solar designs solar-powered systems to meet essential maternity care needs.

We Care Solar Suitcases are designed to be safe, robust and efficient in powering:

- Critical obstetric and surgical lighting
- Mobile phones
- Fetal heart rate monitors and essential medical devices

Our portable suitcase-size system is immediately operational. It can be used as a mobile system or mounted permanently for long-term medical care.

We Care Solar Suitcases can make the difference between life and death by:

- Increasing the capacity to care for mothers and newborns
- Increasing the safety of medical and surgical procedures
- Reducing delays in care

Leadership Team:

*Laura Stachel, MD MPH DrPH
Co-Founder and
Executive Director*

*Hal Aronson, PhD
Co-Founder and
Director of Education*

*Samantha Parsons
Chief Operating Officer*

*Brent Moellenberg
Director of Engineering*

*Christina Briegleb, MPH
Senior Director of Global Programs*

Board Members:

Wadson Muchemwa

*Barry Neal, MS
Treasurer*

Ndola Prata, MD MSc

Matt Rinaldi Ben Rogers

Spencer Weisbroth, JD

*Maame Afon Yelbert-Sai, MA
Board Chair*

Our Technology

The Solar Suitcase is a high-quality, portable and easy-to-use solar electric system designed for low-resource medical settings. It comes with solar panels, a long-lasting lithium ferrous phosphate battery, a charge controller, 12V DC and USB outlets, and the hardware needed for installation. The Solar Suitcase features high-efficiency durable LED lighting for medical procedures, rechargeable LED headlamps, cell-phone charging, and a fetal Doppler and infrared thermometer with rechargeable batteries.

Our Impact

To date, our award-winning Solar Suitcases have brought lighting and essential power to 6,365 health centers in more than 20 countries. We have trained more than 26,000 health workers, ensuring safer deliveries for more than 7.5 million mothers and newborns. Our Solar Suitcases replace candles, kerosene lanterns, and diesel generators, reducing the risk of fire and averting CO₂ emissions.

How We Work

Our partnerships with more than 75 leading NGOs government ministries and UN Agencies are key to our effectiveness. We collaborate with organizations such as UNICEF, UNFPA, Jhpiego, One Heart Worldwide, and Pathfinder International — organizations that use our Solar Suitcases to augment their existing maternal and child health care programs.

Our training programs, led by our Women Solar Ambassadors, develop local knowledge and capacity in Solar Suitcase installation, maintenance and usage. Classroom trainings are followed by supervised Solar Suitcase installations utilizing a comprehensive multimedia curriculum.

Light Every Birth

We have conducted programs in West Africa, East Africa, Nepal and the Philippines. Our new Light Every Birth initiative is ensuring that all health centers have clean energy for safe childbirth, beginning with Liberia, Uganda, Zimbabwe and Sierra Leone. We reached every health center in need in Liberia in 2019.

We Care Solar programs demonstrate the feasibility of providing reliable lighting and electricity to even the most remote health centers in the developing world.
